

Saphir RX

Saphir Rx is a silicone hydrogel lens, featuring a comfortable high-water content, low dehydration material with a highly lubricious surface (CoF = 0.02). Its low modulus (0.33 Mpa) adds to the comfort of the lens whilst ensuring vision quality and easy handling throughout the lens' life cycle.

mark'envoy are continuously improving the technology and design behind their contact lenses. Saphir Rx has a new edge design, resulting in better comfort. To create a personal touch, there is a free of charge option to engrave the patients' name on every box. And to help create patient loyalty, mark'envoy lenses are only available through ECPs. Their lenses cannot be purchased online.

Key Features

- Silicone Hydrogel
- Monthly Soft Contact Lens
- Individually Crafted
- 3 & 6-pack

Recommended for...

- Unique eyes, requiring an excellent balance between comfort and vision

Geometries

- Spheric
- Toric
- Multifocal
- Multifocal Toric

Material

Type	Silicone Hydrogel (75% H ₂ O)
ISO classification	Filcon 5B (60) [75%]
Class 1 UV Filter	Yes
Dk	60
MPa	0.33
Dehydration	1%
CoF	0.02
Handling Tint	Blue

Parameters

Base Curves (mm)	6.80 to 9.80 (0.30)
∅s (mm)	13.00 to 16.00 (0.50)
Spheres (D)	±30.00 (0.25)
Cylinders (D)	-0.75 to -8.00 (0.25)
Axes (°)	All (1°)
Additions (D)	0.50 to 4.00 (0.50)
MF Designs	CD - CN

Saphir RX vs Standard

Saphir RX gives you the options you need to fit any patient, and any eye.

	Saphir RX	Standard
Spheres	241	57
