What Eyelid Wipe is right for my patient?

The Biodegradable Eyelid Wipes and The Eye Doctor Tea Tree Eyelid Wipes are suitable for patients suffering from any of the following:

- 1. Evaporative Dry Eye Disease**
- 2. Meibomian Gland Dysfunction**
- 3. Blepharitis**

The Biodegradable Tea Tree Eyelid Wipes are also suitable for patients suffering with **Demodex**.

The Biodegradable Baby Eyelid Wipes have a mild, effective formula, which are ideal for babies sensitive eyes.

When to dispense?

Patients suffering from common eye conditions should ideally incorporate into their daily eyecare regime. The cooling and soothing formula is ideal for wiping away the secreted oils, keeping eyelids and lashes free from the debris which can be responsible for some of the dry eye symptoms.

Tea Tree Oil Eyelid Wipes are additionally recommended to be used as a preventative measure for Demodex, which can cause irritated, itchy eyelids.

Baby Eyelid Wipes are ideal for removing debris from babies / toddlers eyelids and eyelashes.

FAQ's

Why are the wipes biodegradable?

Made from Viscose fibres, the wipes are fully biodegradable in natural environments: in the soil, compost and both fresh or marine water. They will fully convert back to nature and do not require recycling.

How do the Biodegradable Eyelid Wipes and Tea Tree wipes work?

Eyelid Wipes are ideal for cleaning away debris from the eyelid and eyelashes without irritation. The soap-free, rinse-free formula maintains the lipid layer of the tear film which is essential in reducing tear evaporation.

Our Pre-soaked Tea Tree Biodegradable Eyelid Wipes provide antibacterial and anti-inflammatory properties to help prevent the overgrowth of bacteria and debris on the eyelids which may lead to Demodex infestations.

What is the recommended use?

For all eyelid wipes we recommended one wipe per eye, twice a day as part of an eyelid hygiene regime.
HEAT using the Eye Doctor Antibacterial Eye Compress
CLEANSE using The Eye Doctor Eyelid Wipes
REVIVE using The Eye Doctor Eye Drops or Mist
REPAIR with The Eye Doctor Premium Eye Health Food Supplements
SUPPORT with Optimel Manuka Honey Drops, Gel or Cream.

Baby Eyelid Wipes can be used as and when required.

What ingredients are in the Biodegradable Tea Tree Eyelid Wipes?

Tea Tree Oil: used around the world for its natural antibacterial properties, Tea Tree Oil helps to control natural oil levels on the skin and cleans excess meibum from the eyelids. It is gentle enough to apply topically to fight skin infections and irritations, whilst being powerful enough to relieve painful, irritated skin.

Argan Oil: has skin conditioning properties and is high in vitamin E and fatty acid content. Argan oil is an ideal ingredient to give skin a natural boost.

Micellar Water: a gentle cleanser and make-up remover, micellar water removes dirt and debris without drying the delicate eyelid skin, keeping them clean and hydrated.

Coconut Oil: a natural skin conditioning ingredient which soothes the skin and has antibacterial properties.

Reminders & Precautions

1. Do not use the sachet if opened or damaged.
2. Contact lenses should be removed before use.
3. Use 1 wipe per eye.
4. Single use only – do not reuse.
