

The Eye Doctor® Intensive Relief Eye Mist

Key Features

- + Preservative free
- + Easy-to-use: spray on closed eyes
- + Suitable for use with contact lenses
- + Make-up resistant
- + 10ml bottle

For severe & persistent dry eyes.

The Eye Doctor Intensive Relief Eye Mist stabilises and protects the tear film and improves the moisture of the eye surface. The fast-acting mist is to be used for treatment and alleviation of eye irritation by repairing damage to the tear film caused by external and environmental conditions. This will help soothe patients dry, burning, itchy eyes.

Suitable for
Dry Eye Disease, MGD & Blepharitis

Key ingredients
+ **Pro-vitamin B5**

An ingredient that assists in the reconstruction of the epithelium and has anti-inflammatory properties.* Acting as a hydrating agent, it keeps the ocular surface comfortable and is interrelated with its capacity to regenerate the epidermal barrier.*

+ **Liposomes**

Help to repair the unstable lipid layer that causes EDE. Clinical studies show that liposomes significantly increase the lipid layer thickness and tear film stability following application, ultimately easing the discomfort of dry eyes and providing instant relief.*
