

# WHY CHOOSE VISCOADAPTIVE EYE DROPS?

Viscoadaptive eye drops enhance the three **natural layers of the tear film** and are remarkably **comfortable** and **long-lasting**.

I-DROP® combines the **cohesive** properties of the viscoelastic hyaluronan, and the **dispersive** properties of a low molecular weight glycerin lubricant.

I-DROP® viscoadaptive products are highly effective at **hydrating** and **lubricating** the cornea while **reducing tear film evaporation**; generally recognised as the principle factors required to improve the symptoms associated with dry eye disease.

**I-DROP® PUR** and **I-DROP® PUR GEL** promote excellent coating and recoating of the eye with every blink, delivering superior moisturising and lubrication.

# I-DROP®

VISCOADAPTIVE TEARS FOR DAILY DRY EYE RELIEF

**PRESERVATIVE FREE**

**LONG LASTING**

**FAST ACTING**

# I-DROP® PUR

I-DROP® PUR is recommended for patients diagnosed with **mild to moderate chronic dry eye syndrome** looking for the ultimate relief and comfort for their dry eyes.

The unique formulation containing **0.18% hyaluronic acid**, continually refreshes and stabilises the tear film, bringing immediate and lasting relief with every blink and providing superior comfort with fewer applications.

Our unique **one-way valve dispenses 1 sterile dosed drop** at a time and prevents product from re-entering the bottle. Our **silver-ion anti-bacterial tip** ensures safe, sterile delivery of each drop. The distinctive blue tip helps you to “aim” when using the drops.

## LONG LASTING RELIEF WITH EVERY BLINK

- Preservative free
- Superior moistening and lubrication
- Blink-activated coating of the ocular surface
- Long lasting - fewer daily applications needed
- No blurred vision or foreign body sensation
- Contact lens compatible
- For use within 12 months of opening

# I-DROP® PUR GEL

with 0.30% hyaluronic acid

I-DROP® PUR GEL contains 0.30% hyaluronic acid with added glycerin and is recommended for patients with **severe chronic dry eye syndrome**.

I-DROP® PUR GEL changes its viscosity with each and every blink, ensuring excellent surface coverage and a significantly longer lasting artificial tear.

I-DROP® PUR GEL is the most effective preservative-free artificial tear available and its innovative formulation provides superior comfort with fewer applications.
