FAQ's

How does The Eye Doctor Hypochlorous Eyelid Spray work?

The Eye Doctor Hypochlorous Eyelid Spray is a pH balanced eyelid and periocular solution. It effectively cleanses, calms and protects eyelids, lashes, tear ducts and skin from inflammation that can lead to long term Dry Eye symptoms. The spray employs an advanced proprietary Hypochlorous technology to provide highly effective periocular hygiene and protection, without causing irritation to the delicate ocular surface or periocular skin. Recommended by Ophthalmologists, the solution is safe and suitable for sensitive eyes and skin of all ages.

Why is Hypochlorous important?

Many types of bacteria live on the eyelids, when there is an imbalance of bacteria, the body can react to the proteins and toxins that some bacteria produce. The lids are a perfect home for bacteria, with warm, moist, nutrient rich habitation in abundance. Blepharitis, whether frank and obvious, or subtle and lacking any obvious crusts, results in an overgrowth of normal skin bacteria.* The technology in this spray delivers effective cleansing and broad-spectrum antimicrobial activity against transmissible respiratory contamination and eyelash and eyelid organisms responsible for lid margin inflammation and Dry Eyes.

How should my patient use The Eye Doctor Hypochlorous Eyelid Spray?

It is suitable for the periocular surface, lids and face. It can be sprayed onto open or closed eyes and is suitable for use under make-up. When using, apply generously and ensure the area is thoroughly misted with each application, this can then be left to air dry. Can be used as often as required.

Can my patient use with contact lenses?

The Eye Doctor Hypochlorous Spray can be used with hard or soft contact lenses. Your patient does not need to remove their contact lenses before application.

What other products should I recommend to my patient to use alongside The Eye Doctor Hypochlorous Eyelid Spray?

For best results, a 5-step eyecare regime is recommended:

HEAT using The Eye Doctor Antibacterial Hot Eye Compress

CLEANSE using The Eye Doctor Hypochlorous Eyelid Spray

REVIVE using The Eye Doctor Eye Drops or Mist

SUPPORT with The Eye Doctor Premium Eye Health Food Supplements

REPAIR with Optimel Manuka Honey Drops, Gel or Cream.

Reminders & Precautions

1. If irritation occurs, discontinue use.
