Apply the drop along the lash and lid margin of a closed eye. Rub gently back and forth, blink, and let it dry naturally

What is Zocular ZocuShield Eye Gel?

Zocular ZocuShield Eye Gel harnesses the power of natural ingredients to provide effective care for the delicate skin around the eyes. Formulated with activated okra complexes and plant extracts, it offers a unique blend of soothing and cleansing properties. The micellar properties of this eye gel ensure thorough yet gentle cleansing, making it ideal for addressing various concerns such as dirty, dry, swollen, and puffy eyelids. Additionally, its potent anti-inflammatory properties help reduce inflammation without causing any stinging or irritation to the skin or the ocular surface.

Suitable for?

Zocular ZocuShield Eye Gel is suitable for patients suffering from any of the following.

- **Dry Eye Disease:** ZocuShield's advanced gel formulation helps alleviate symptoms associated with dry eyes by providing hydration and lubrication to the ocular surface, offering relief from discomfort and irritation.
- **Blepharitis:** ZocuShield's cleansing properties make it effective in managing blepharitis, a common condition characterised by inflammation of the eyelids, by removing debris and irritants from the eyelid margins, thereby reducing inflammation and promoting overall eyelid health.
- **Demodex Infestations:** The activated Okra polysaccharide complex in ZocuShield penetrates through biofilm to cleanse the eyelids, effectively targeting Demodex mites that may contribute to eyelid inflammation and irritation.
- **Inflammation (Biofilm-induced Ocular Surface and Eyelid Inflammation):** ZocuShield's innovative formulation is specifically designed to combat inflammation caused by biofilm buildup on the ocular surface and eyelids, helping to soothe discomfort and promote healing.
- **Itchy Eyes:** Whether caused by allergies, environmental factors, or other irritants, ZocuShield can help relieve itching and discomfort, providing soothing relief to the eyes.
- **Dry, Flaky Skin:** ZocuShield provides nourishment to the delicate skin around the eyes, helping to alleviate dryness and flakiness, resulting in smoother, healthier-looking skin.

**Also, best dispensed to patients after your in-practice ZEST treatment to continue their Dry Eye therapy at home, to maintain eyelid hygiene in-between practice visits.*

Active ingredients

Glycerin, Sodium Chloride, Sodium Lactate, Potassium Chloride, Calcium Chloride, Phenoxyethanol, Ethylhexylglycerin

Results

The image shows a patient exhibiting demodex blepharitis, characterised by misaligned lashes, redness, crust formation, inflammation, and swollen eyelids. Symptoms typically include ongoing irritation, particularly in the mornings, along with persistent discomfort and excessive tearing.

After daily use of Zocushield, during slit lamp examination, you will observe eyes appearing noticeably brighter, with a reduction in demodex blepharitis, hyperaemia, and cleaner, non-clumped lashes. Overall inflammation is reduced. Patients typically describe increased comfort and a visibly whiter appearance in their eyes.

FAQ's

What is Zokrex™?

There's a new patented technology called Zokrex™ that utilises activated Okra complex derived from fresh Okra to address the underlying inflammation that causes a host of eye-related problems. From Dry Eye to Styes, Zokrex™ is designed to provide immediate relief and promote healing in a way that is gentle and effective. Zokrex™ is the foundation of every Zocular™ product, meaning you can experience the powerful benefits of activated Okra complex for yourself, without a prescription.

What is Okra?

Okra is a well-known topical vegetable grown worldwide. Due to abundant bioactive compounds, such as polysaccharides, the antibacterial, anti-inflammatory and immune regulatory effects of Okra have been proven and are widely applied in the cosmetics industry, where the safety and efficacy of Okra has been established. Due to the curative and medicinal effects of Okra, clinical studies show that it may confer therapeutic effects in patients with Blepharitis and Dry Eye.

How long does it take to see results with ZocuShield?

Results may vary depending on individual circumstances, but some users may notice improvements in eye comfort and appearance within a few days to weeks of regular use.

Reminders & Precautions

- **Avoid Contact with Eyes:** While applying ZocuShield, ensure that it does not come into direct contact with the eyes. Use caution and follow instructions to prevent irritation or discomfort
- **Avoid Contamination:** To maintain product integrity, avoid touching the tip of the dispenser or allowing it to come into contact with any surfaces. Keep the cap securely closed when not in use.
- **Consult with Healthcare Provider:** If you experience any discomfort, irritation, or adverse reactions while using ZocuShield, discontinue use and consult with your healthcare provider. They can provide guidance and recommend alternative treatments if necessary.
