## FAQ's

### What is Sterileyes® antibacterial protection?

The Sterileyes® fabric is antimicrobial to the three leading causative microorganisms of eye infections and that associated with dry eye development.

Sterileyes® is an antibacterial shield on the compress, permanently bound to the fabric fibres and clinically proven to reduce potentially harmful bacteria by up to 99.99%. The patented, stay fresh, skin friendly technology inhibits the growth of odour-causing bacteria. Sterileyes® does not interfere with your skin's natural bacterial flora.

### What are BodyBeads?

BodyBeads are a medical grade silica, using self-hydrating technology to absorb moisture from the air. When BodyBeads are heated they release a moist heat onto the eyelids to effectively relieve your eye conditions.

### What temperature do the compresses reach?

After following the heating instructions, the compresses will reach the optimum temperature to treat conditions identified.

### What products can your patient use with the eye compress to improve their eye conditions?

A 5-step eyecare regime is recommended. **Heat** using The Eye Doctor antibacterial compress. **Cleanse** with The Eye Doctor eyelid wipes or cleansers. **Revive** with The Eye Doctor Eye Drops or Mist. **Support** with The Eye Doctor Premium Eye Health Food Supplements. **Repair** with Optimel Manuka Honey Drops, Gel or Cream.

### How often should I use my compress?

The Eye Doctor Premium & Essential – use for 7-10 minutes, twice a day for two weeks. This can be reduced to once a day and then a couple times a week as required, once symptoms have been alleviated.

The Eye Doctor Styel Relief –for treatment of a styel, use as and when required.

The Eye Doctor Click & Go –ideal for travel, use as and when required.

## Reminders & Precautions

1. Head straps on the eye compresses may contain latex rubber.
2. Refer to the instructions for heating times.
