

NEW INNOVATION!

EasyTM on off LENS TOOLS

**Help your patients with lens handling & reduce dropouts!
Easy On Off makes insertion and removal of all types of contact lenses easy! ***

Recommendations from leading Norwegian optometrists:

"Thanks to Easy On Off's lens tools, life has become easier for many of our lens wearers. For some, the tools make the difference between good vision wearing specialty lenses or remaining visually impaired using their regular glasses! Our experience is that the tools ease the contact lens handling more effectively than other available tools in the market."
